Bed system van with kitchen -
Spacetourer XS,M,XL / Pössl Vanster / Traveller L1,L2,L3 /
Proace Verso compact,L1,L2 / E-Ulysee / Zafira Life S,M,L

1. Bed system assembly

- The folding brackets are marked: H = back (German: hinten) and V = front (vorne).

Note: To close the bracket, press the feather buttons and flap the feet into the aluminium profile.

- With the short wheelbase (Spacetourer XS/Proace Verso Compact) the rear seat bench has to be removed.

- With the medium wheelbase (Spacetourer M/Pössl Vanster/Traveller L2/Proace Verso L1) the rear seat bench can remain in the car but needs to be locked in a position more to the front to unfold the back rest.

With back seats:

- Flap the seats and place the height compensation blocks lengthwise on the seats (pic. 1).

(If all three seats in that row are used, place the blocks on the outermost seats.)

- Hang the broader of the two sleeping boards to the rear board and place it on the connection points of bracket H respectively - with Spacetourer M/Pössl Vanster/Traveller L2/Verso L1 - the flapped seats of the last row.

- Pull the narrow sleeping board to the front until its bore hole engage on the middle board and place it on the flapped front seats with the height compensation blocks (pic. 2).

Note: Depending on the seat variation it can be necessary to also place the closed bracket V on the blocks, with the non-slip dots upside.

- If you use only two seats in the front row, use a single pillar adapted with Velcro stripes (pic. 3).

- Unfold the mattress into the passenger compartment...and have a good sleep on our cosy VanEssa bed (pic. 4).

No back seats:

- Hang the broad sleeping board to the rear board and place it on the connection points of bracket H (pic. 5-7).

- Pull the narrow sleeping board to the front until its bore hole engage on the middle board and place it on the connection points of bracket V (pic. 8).

2. Storing

While driving with the folding board in storage position, make sure that the bore holes on the bottom are engaged in the fittings of the rear kitchen - especially when it is used without any seats (safety reasons). As an additional fastening, you can fix board and mattress with tension belts (pic. 9).
