## Bed system - Berlingo III XL / Rifter L2 / Combo E XL / ProAce City XL

### 1. Rear board installation

- Lift the rear board into the back of the car (pic. 1) and push the board down for the Velcro stripes sticking to the floor inside the passenger compartment (pic. 2).
- Fix the rear board with the two lashing straps onto the tie-down rings and secure the fasteners with the locking pins (pic. 3+4).
- Tip: For models where the tail is larger, we pack adjusting screws, which you can screw into the side of the tailboard.

### 2. Bed system assembly

- Fold the back seats (pic. 5).
- Lift the folding board a little and pull it into the car until the folding board engages in the connection points of the rear board. Thereby the wooden pillar swings out automatically (pic. 6+7).
- Secure the wooden pillar by plugging the included foam blocks into the notches on the back side of the folded seats (pic. 8).
- Unfold the mattress into the passenger compartment...and have a good sleep on our cosy VanEssa bed (pic. 9 + 10).

### 3. Storing

While driving with the folding board in storage position, make sure that the bore holes on the bottom are engaged in the fittings of the rear board - especially when it is used without any seats (safety reasons). As an additional fastening, you can fix board and mattress with tension belts (pic. 11).
