Bed system van - T5/T6 Transporter/Caravelle no seats/double-seat bench

1. Rear board installation

- Remove the screws of the rear tie-down rings and take the rings out (pic. 1).
- Position the rear board inside the vehicle (pic. 2).
- Fix the rear board on both sides by tightening a M10 screw into the threads of the tie-down rings (pic. 3).
- Mount the adjusting screws on both sides until they are fixed with the vehicle lining (pic. 4).

Note: For a VW Transporter with lining on both sides you have to replace the long adjusting screw by a short one which is included in delivery.

2. Bed system assembly

- Fold out the feet of the folding bracket marked H and stand it behind the double-seated bench (if applicable).

Note: To close the bracket, press the feather buttons and flap the feet into the aluminium profile.

- Hang the folding board into the connection points of the rear board and onto the folding bracket (pic. 5).
- Unfold the folding board and place it on the second folding bracket marked V (pic. 6+7).
- Unfold the mattress into the passenger compartment...and have a good sleep on our cosy VanEssa bed (pic. 8).
- As an optional fastening (two include in delivery), fix the mount with the countersunk screw in the tie-down rings and put the feet of the rear folding bracket into the mount (pic. 9).

With double-seat bench:

- Unfold the folding board onto the bench, instead of the single seat use a single pillar adapted with Velcro (pic. 10).

Note: If the bed system is installed in a Transporter/Caravelle with long wheelbase, the front part of the folding board also lies on the front bracket (V), because the bed length ends behind the double-seat.

3. Storing

While driving, the folding board lies on the rear board. For safety reasons, make sure that the bore holes on the bottom of the folding board are engaged in the fittings of the rear board - especially when it is used without any seats (pic. 11).
