

# Installation guide

## Kids bed - VW T5/T6/T6.1

### 1. Installation kids bed

- Move driver's and co-driver's seat to the back until the sleeping board fits between seats and dashboard (pic. 1).
- Place the board on both seats (level height) with the cutout pointing towards the dashboard (pic. 2+3).

### 2. Fixation kids bed

#### T5/T6/T6.1 Multivan/Beach (from Facelift 2010):

- Fasten the two shorter lashing straps to the handhold on driver's and co-driver's side (pic. 4).  
*Note: If there's no handhold on the driver's side, fasten the lashing strap around the steering wheel (pic. 5).*
- Thread the lashing straps through the slots in the board and fasten them around the head rests on both seats. Watch out for the straps entering and leaving the slots on the underside (pic. 6).
- Place the mattress on the sleeping board and the kids bed is ready for use (pic. 9).

#### T5/T6/T6.1 Transporter/Caravelle:

- Hang the two aluminium angles into the front storage shelves and place the board on the non-slip dots (pic. 7+8).
- Thread the lashing straps through the slots in the board and fasten them around the head rests on both seats. Watch out for the straps entering and leaving the slots on the underside (pic. 6).
- Place the mattress on the sleeping board and the kids bed is ready for use (pic. 9).

### 3. Storing

While driving, the kids bed can be stored in the back (e.g. on the rear kitchen or rear board). The two-piece variant can also be handily stored in the passenger compartment.
