

VanEssa Mattresses -foldable

-Made in Germany -

Our VanEssa sleeping pad is made and processed exclusively from excellent quality materials and offers therefore the highest lying comfort.

It consists of a Viscotherm* cold foam mixture and has a very good adaptability to the body contours. Slight unevenness, such as with a sleeping bench, is evened out very well. During the day / while driving, it can be folded back for easy storage.

The mattress can be covered with a fitted sheet that can be folded when setting up and taking down the sleeping system and is easily washable after use.

Our Comfort sleeping pad is made of the following materials according to the Ökotex standard:

- Cold foam-Viscotherm mixture, edged with upholstery fleece.
- High-quality mattress cover made of polyester, with zips.
- All three mattress parts are connected by the cover.

The cover corresponds to the respective firmness level 2 (volume weight: 40-50). The cover is washable (recommendation 40°C gentle wash cycle).

Depending on the vehicle model, our mattress is available in 3 or 4 parts. (remaining space in the boot / position of the rear seats is decisive). With our split sleeping systems you get two separate sleeping pads.

weight: 10-12 kg
dimensions: width and length variable, depending on sleeping system, height 10 cm
details: 6 cm foam, 3 cm viscose, 1 cm fleece

*Viscotherm:

The Viscotherm layer adapts to body heat and body contours and ensures excellent point elasticity and thus very good sleeping comfort.
