Mattresses, 3-part or 4-part – available as Basic* or Comfort

The comfortable coldfoam mattress with seat cover fabric adapts itself perfectly to your body contours and compensates the unevenness of the bench. It is to be unfolded over the bed area (rear board or kitchen + folded bench or sleeping board) and provides the basis for a bed that can be easily used by two persons.

Our high-quality mattress is made of very good materials for long-term use. You can easily use a fitted sheet which can be folded together with the mattress - for easy cleaning after its usage.

While you are driving the mattress can be folded and stored on top of the rear board or kitchen in the boot. The mattress coating is made out of polyester and is washable. The three foldable parts of the mattress are connected to one another by cover fabric.

BASIC type: *coldfoam with fleece, height 7 cm*

COMFORT type: *coldfoam + viscotherm with fleece, height 10 cm*

Viscoelastic: The viscoelastic (memory foam) layer adapts to the body heat and body contours, which ensures excellent point elasticity and thus a very good sleep comfort.

- 3- or 4-part
- produced according to Oekotex standard
- with black or anthracite car fabric (polyester)
- washable
- with zippers

BASIC: * not for every bed available
