

# Installation guide

## V3 kitchen

### Dacia Dokker

VanEssa  
mobilcamping

#### 1. Installation

- Excavate the rear tie-down rings and remove the screws (pic. 1-3).
- The drawers can be taken out in order to reduce the kitchen's weight (pic. 5).
- Note: Push the orange clips at the bottom of the drawers simultaneously and take it out (pic. 6).*
- Place the kitchen in the vehicle (pic. 4).
- Note: For an easy installation we recommend our mounting trolley (pic. 6).*

#### 2. Fastening

- Fix the kitchen with the M8 countersunk screws left and right through the bottom of the kitchen into the threads of the tie-down rings (pic. 7+8).
- Note: To find the threads of the tie-down rings easier, plug a screwdriver into the hole, lift the kitchen a little and arrange the kitchen above the thread of the threads of the tie-down rings.*
- Push the drawers back into the kitchen until they engage (pic. 9).

#### 3. Electrics & Water tank

- Plug the cable from the kitchen into a 12 Volt socket. Draw the included spring with the screw in one of the threads at the back of the coolbox. The spring holds the cable up and thereby avoids the cable to be clamped (pic. 10+11).
- The opening lid must be adjacent to the fridge/freezer. The water hose has to be placed like a loop (pic. 12).
- Empty water tank and hose completely after touring to avoid frost damage, calcification, bacteria etc..
